

Using
HorseTail Hair
with
Daz Figures
Genesis, Genesis 2 and Genesis 3

Copyright (c) 2016, Winterbrose Arts and Graphics. All Rights Reserved.

1. Download free HorseTail Hair prop by AprilYSH from the online store:

<http://shop.aprilsvanity.com/free-items/horsetail-hair-model-textures.html>

NOTE:

The file is titled AprilYSH_HorseTailHair.zip and contains two other zips.

2. You will need to know where Daz Studio stores your DS and PS content. To find your location, go to Edit / Preferences from the main menu in Daz Studio. Next click on the Content Library tab and then click the Content Directory Manager button. This will display the hierarchy for where your DAZ Studio Formats and Poser Formats are stored. For our Windows machine, we found it here:
C:\Users\Public\Documents\My DAZ 3D Library

3. Install content of both zip archive files into your "My DAZ 3D Library" folder:

AprilYSH_HorseTailHair_DS.zip

AprilYSH_HorseTailHair_PS.zip

4. Time to load the figure you desire, load the hair and apply the preset for posing.

GENESIS

- * Load Genesis
 { *DAZ Studio Formats / My DAZ 3D Library / People / Genesis /* }
 - * Select Genesis in Scene tab
 - * Load HorseTail hair prop(will auto-parent to figure)

 - * Make manual Adjustments: yTrans -2.77 zTrans = -4.87 and xrot = -3.00
-
-

CONCLUSION:

Please note that for all figures and characters, you may need to make manual adjustments to the HorseTail Hair prop to ensure it is properly fitted/aligned.
