

Video-Wallboard v1

Embedded MP4/WMV Web-Based Playable Video Wallboards for Windows

Copyright (c) 2013, Winterbrose.

All rights reserved.

www.WINTERBROSE.com

Full Description

Video-Wallboard creates web-based wallboards with embedded MP4/WMV videos matching the user's search criteria. Once created and saved, these webpages can be used to quickly view videos on the page or full screen (if available). Embedded videos in HTML pages require significant processing power and high demands on the system graphics hardware. Users need to have the most current version of their favorite browser (Internet Explorer, Firefox, Chrome) with all required plug-ins for viewing embedded MP4 and WMV video files.

WARNING:

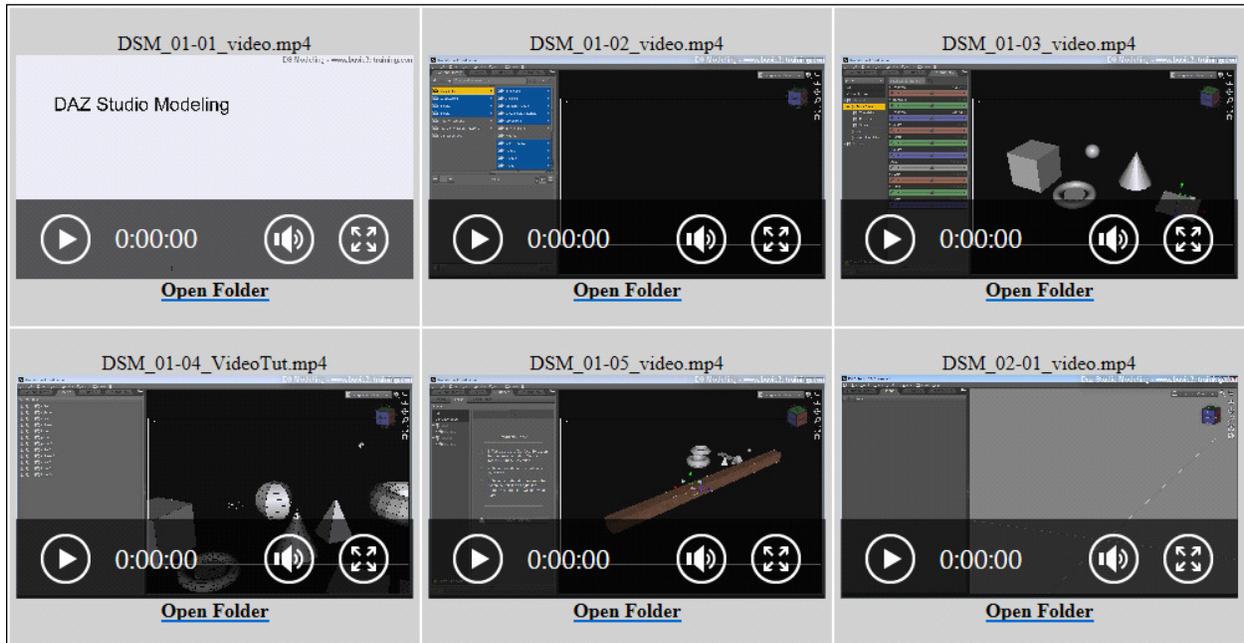

Video-Wallboard is capable of generating system intensive webpages. Please do not create wallboards with more entries than can be supported by your web-browser and system configuration. Winterbrose recommends no more than 15-entries for optimal performance, and no more than 30-entries maximum for any wallboard project.

NOTICE:

DO NOT purchase Video-Wallboard until you have successfully used the Demo version to create Wallboards compatible with your Computer System and Web Browser.

myVids MP4 Format

- Google Chrome with all updates and required video plug-ins
- Not guaranteed to function with Firefox browser

Demo Version

- The DEMO showcases the power of Video-Wallboard for video collections

Licensing

The purchase of Video-Wallboard software entitles the **original purchaser** to a non-transferrable **single user license** for the Video-Wallboard software package to be installed and used on a single computer system. Video-Wallboard software is not authorized to be used for projects that violate copyright and trademark laws. Do not use copyrighted or trademarked materials with the Video-Wallboard software without the prior permission of the respective owners. **Purchasers will receive their personalized serial number from the reseller where this product was purchased. Please note that the serial number you are issued does not include any spaces (blank characters) when using it.**

IMPORTANT NOTICE

Please read this section carefully before purchasing Video-Wallboard. With few exceptions, all sales are final! No refunds on purchased software! Every computer system has a unique hardware and software configuration. Under certain conditions, Video-Wallboard may be impacted by your system's hardware/software

configuration. Conflicts could derive from the use of outdated video drivers, not having enough system resources like memory or storage available, incompatibilities with your particular video card, or for many other possible reasons. Therefore, all users are highly encouraged to download the Demo Version of Video-Wallboard to test drive the program and check for compatibility with your computer system BEFORE purchasing/ordering a copy of the Video-Wallboard application software.
